"Eradicate Corruption – Build a New India"

We all are aware that the use of power for personal interest or gains is termed as corruption. It is a common problem that leads to various other serious issues. Bribery, graft, extortion, kickback, cronyism and embezzlement are different forms of corruption. Corruption, a social evil occurs at various levels in society, which is proving detrimental to the health of the economic and technological prosperity of the nation.

2. For building a New India by 2022, the Government of India has fastened its belt to slice-off a thriving deep rooted nuisance called Corruption. History suggests that when the people of a country unite against an oppressive evil, the evil is controlled. India, I feel, has a strong potential of getting rid of corruption if everyone works in unison, pledges not to take or give bribe and also undertake some serious measures for tooth and nail eradication of this problem.

3. Only by creating awareness among citizens and empowering them, it is possible for India to become totally corruption free. The nation is celebrating "Vigilance Awareness Week" from 29th October to 3rd November, 2018 for promoting integrity, transparency and accountability in public life by building a corruption free India and laying the foundation for a better tomorrow for posterity. Though, building a corruption free India is certainly not easy, but it's neither impossible too. Firstly, it is important to identify the existing gaps and loopholes and try to redress those by imposing strict checks and balances at every level. Let Team India join hands and eradicate corruption from the society.

JAI HIND!
