MESSAGE

D.O. No. 2242

Hon'ble Prime Minister Shri Narendra Modi has been waging a relentless battle against corruption since he took over in 2014. Under his leadership, the government has reaffirmed its commitment against corruption through legislations and affirmative action.

In the last 70 years, corruption has spread its tentacles far and wide. It has hampered decision making and development and "normalized" it as a part of our daily social milieu.

Our government has simplified processes and removed control in order to ensure transparency. However, legislation alone cannot eradicate corruption and build a New India that is free of this social ill. The participation of people especially the youth in this fight is pertinent. Our government has ensured that citizens get involved in the fight against corruption. Digitization is a great leap forward. It has ensured transparency, reduced human intervention and ensured the benefits of government schemes reach the deprived.

The Modi-led NDA government has paved the way for winning this fight against corruption and building a New India.
